-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-11 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Hannaway, US Patent Application 2002/0103919. Hannaway discloses a webcasting method and system comprising streaming media sources 150, 160 having media servers 154, 164 as capturing means, streaming media synchronization system 110 as output means for outputting a live performance guide output based on supplied synchronization information from the stream media sources (synched media signals 114) and as a transmitter means for transmitting supplied synchronization information (media server control signal 116) back to the streaming media sources. As to claims 10 and 11, end-user nodes 180 and 190 extract the synchronization information and have media player 192. Regarding claim 17, figure 2 discloses time-based synchronization controller 230 for supplying the synchronization information.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2644

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hannaway in view of Knappe et al, US Patent 6,850,496. Hannaway does not disclose synthesizing means for synthesizing signals and transmitting a synthesized signal with the synchronization information to other devices. Knappe discloses a teleconferencing system over a packet data network 32 comprising a mixers 102L and 102R for mixing captured data from different endpoints in figure 6. The jitter buffers 90, 92, and 94 are used to synchronize the data from the endpoints. Therefore, it was taught to synthesize (mix) signals in a system having multiple data sources. It would have been obvious to one of ordinary skill in the art at the time of invention to modify Hannaway to include the mixer of Knappe for the purpose of including all the data from the media sources in an output for presentation. Claims 12-14 are met.

Allowable Subject Matter

Claims 1-8, 22, and 23 are allowed.

Claims 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cohen, US Patent 6,501,739 and Shibata, US Patent 6,801,630.
